---

## Experience

Graebert - ARES CAD software  
Frontend React Developer  
August 2024 - Present (4 months)  
Yerevan, Armenia

Developing frontend for ARES Kudo

MetaLamp  
Frontend React Developer  
March 2024 - August 2024 (6 months)  
Project to develop a hotel booking website.

: NextJS, SCSS, Pug, TypeScript, Redux, Firebase, Webpack, SCRUM, GitLab.

:

- 1) Developed a website for hotel booking as part of a custom development.
- 2) Set up working with Firebase.
- 3) Connected Redux.
- 4) Created a library to validate the entered date.
- 5) Organized and carried out regular refactoring of the code base.
- 6) Organized product demonstrations for a business customer every 2 weeks, providing prompt feedback and a high level of customer involvement in the development process.

Martspec LLC

## React Web Engineer

June 2023 - June 2024 (1 year 1 month)

Austin, Texas, United States

I develop and maintain a website for a product company that develops applications for Apple Watch.

: React, Webpack, TypeScript, SCSS, Bootstrap, Polyglot, Jira, GitHub.

:

- 1) Accelerated the loading of images on the site by 30% by converting to WebP format, which improved the user experience and increased retention on the site.
- 2) Speeded up the loading of web pages by 10% using the PurgeCSS plugin, which reduced the size of CSS files by 3 times.
- 3) Introduced a unified code style, which speeded up code reviews, improved team work and increased code readability for all project participants.
- 4) Created a "Career" page, making access to information about vacancies in the company more convenient for users.
- 5) Improved localization by translating the interface into 11 languages, which increased the accessibility of the product to an international audience.
- 6) I mentor junior developers: I provide consultations, set and monitor tasks, and conduct regular code reviews.
- 7) I improve the user experience together with designers, working on component and page layouts.

## Self-employed

Freelance React Web Developer

December 2022 - May 2023 (6 months)

Projects:

- Developed of a landing for the customer
- Designed a forum for the customer
- Created a mobile app for viewing photos from Martian rovers (React Native, NASA APIs)
- Developed website with recipes for dishes (React + Bootstrap + TheMealDB)
- Solved problems on HackerRank and LeetCode problems (JS and TS) and ProjectEuler problems (C#)

## Developer Express, Inc.

.NET Developer

August 2022 - December 2022 (5 months)

Yerevan, Armenia

Technical support for customers (developers) of DevExpress component libraries in English.

: .NET Framework, Visual Studio, C#.

:

- 1) Gave recommendations on the use of company products to solve applied problems
- 2) Demonstrated the functionality of the product to users on their own demo projects, helped in the implementation of the product.

### Strizhament

Middle 1S Developer

July 2021 - July 2022 (1 year 1 month)

Stavropol, Russia

I supported and customized 1C:Retail 2.3 for the "Vinoteka Strizhament" store chain. During this time, I:

- Configured synchronization with the "Vinoteka Strizhament" mobile application via REST API.
- Set up synchronization between 1C: Retail and the Bitrix website (rewriting 40% of the integration module).
- Reduced the number of support requests from employees in 70 stores by 50% by resolving configuration errors in the 1C: Retail system.
- Configured MS SQL Server and implemented database backup procedures.
- Managed the transition of the store chain to 1C: Retail during a merger.

### Portal-Yug

Junior 1S Developer

August 2020 - July 2021 (1 year)

Stavropol, Russia

### Godograf

Computer Science Teacher

September 2019 - November 2020 (1 year 3 months)

Stavropol, Russia

### Unium

Computer Science Teacher

September 2017 - May 2019 (1 year 9 months)

Stavropol, Russia

---
